Import and Export inspections

Verify the conformity, safety and quality of your products on source

The increasing globalization of the industry requires greater control of the overseas manufacturing process and supply chain. Control product compliance with regulatory, safety, functional and quality requirement on source is critical to manage your supply chain and reduce associated risks.

Our solution

Applus+ Laboratories, as an independent entity, offers a comprehensive control service in overseas manufacturing and international trade, which includes:

- Supplier audit services
    - Production and Quality audit
    - Social compliance audit
- Inspection Services
    - Initial sample inspection
    - On-line inspection
    - Pre-shipment inspection
    - Loading Supervision
- Testing services
    - Witness test
    - Sampling and laboratory testing
- Expediting services

Our inspection services cover all Mainland China. We have China based testing facilities and permanent teams in main China regions.

Benefits

- One-stop solution to ensure quality of your products, form initinal supplier audit to loading supervision of the finished goods.

- Fast and flexible reporting
- Multicultural and highly qualified inspectors
