

Loading supervision (LS)

Ensure your goods before arrival

The globalized industrial world requires strict control of the risks associated with the international shipments. The loading supervision, as the last step of your activity, is important to ensure the reliability of your products and components assuring the customers' expectations and compliance with the requirements and regulations of the destination market.

Our solution:

Applus+ helps you to confirm the quantity and quality of the product ordered, making sure that matches with the specifications and approved samples provided. The entire container loading process is strictly supervised by our qualified inspectors. Our services include, but are not limited to:

- Sampling services
- Operational control of loading and discharge
- Environment compliance
- Packaging list control
- Quantity and weight control
- Container sealing ID verification
- Checking of the stowing, fastening and wedging of transport

As a leading inspection company, we provide services in all Mainland China through the highest qualified and professional personnel. We have China based testing facilities and permanent teams located in main China regions.

Benefits:

- Guarantee the product securely loading
- Ensure the whole shipping of the products
- Early involvement in project development and flexibility
- Multicultural and highly qualified inspectors with recognized skills
- Comprehensive and real time reporting
